Responsible Investment

Our ISA funds are designed to respond to environment, social and governance (ESG) risks such as climate change. They aim to increase exposure to companies with a favourable ESG profile, while decreasing investments in companies with a lower ESG score.

By doing so, the funds aim to influence positive change - ensuring companies are actively combatting the issues of climate change, while managing risk and generating sustainable long-term returns.

Unit-linked funds

Our funds are unit-linked, which means that with every contribution you make, you are allocated units. The number of units would depend on the unit price applicable on the date of allocation.

The value of your account is the total number of units held by you multiplied by the unit price applicable on the date of calculation.

Switching funds

You can switch between funds at no cost.

Based on future pricing

When you contribute to, withdraw from your account or switch between funds, the value is calculated based on the next declared unit price. This is a practice that aims to protect the funds. The unit price is calculated weekly, but this may vary.

Our funds

We offer two funds, both of which aim to provide a combination of growth and income. However, they provide a different level of risk/return and approach to investment.

TFS Future World ESG Developed Markets Fund

Invests in:

Shares in companies that demonstrate good environmental, social and governance (ESG) efforts in developed countries.

(Asset Class: Equity)

Approach:

Tracking the performance of the ESG Index - focuses investments in companies with a favourable ESG profile compared with others.

Level of risk:

Higher risk / return

Appeals to:

Individuals looking to invest responsibly, by tilting to responsible and sustainable companies.

TFS Future World ESG Multi-Index Fund

Invests in:

Bonds, shares, money market instruments, deposits, cash and indirectly to alternative asset classes and property.

(Asset Class: Multi Asset)

Approach:

Invests at least 50% in investments that incorporate environmental, social and governance (ESG) criteria, while staying within its pre-determined risk profile.

Level of risk:

Medium risk / smoother returns

Appeals to:

Individuals with a more cautious approach to investment, who are also looking to incorporate a responsible investment method.

Please remember that the value of the investments can go down as well as up, so the Child may get back less than what you pay in.
